Assignment 0

Jack Edwards

January 23, 2026

Here is where I would disclose anything that the graders and/or professor should know about, such as outside resources used or classmates who I worked with.

1. My solution to problem 1

$$\frac{d}{dx}\sin(x^2 + 6x) = \cos(x^2 + 6x)\frac{d}{dx}(x^2 + 6x) \tag{1}$$
$$= \cos(x^2 + 6x)(2x + 6). \tag{2}$$

2. My solution to problem 2.

$$\neg(A \cap B) \equiv \neg A \cup \neg B \tag{3}$$

3. And so on.

A	B	$A \wedge B$
T	T	T
T	F	F
F	T	F
F	F	F

4. $\mathbb{R}$ denotes the real numbers. $\mathbb{N}$ denotes the natural numbers. It is of course the case that $\mathbb{N} \subseteq \mathbb{R}$.
